

## **L'origine du monde - *How the World Began***

Loïc Pierre, together with Mikrocosmos, has created ground-breaking musical landscapes for his forty “a capella” singers, always searching for originality in the sounds and stage setting. “How the World Began” is the result of several years of creation with contemporary musicians, a huge project comprising four performances. A condensed version of these four works is presented here, where music, theatre, fragments of popular music, colourful sound effects, Baltic or imaginary languages are all combined in such a way that we are immersed in a musical and dramatic experience, a sensuous adventure for both eyes and ears. Renowned world-wide, and winner of twenty international prizes, Mikrocosmos has developed an audacious spectacle for our entertainment.

Chœur Mikrokosmos  
Conductor: Loïc Pierre
